

Pakula Sprocket - 12". "Hot Frigate". Top Trolling Lure.

The Small Sprocket, also known as the Medium Sprocket, is a long rigger lure with a tight swimming action that will work in all conditions at any trolling speed.

This family of lures has been responsible for a great many of the successes of Pakula lures in fact as Peter Pakula says: "always run one of the Sprocket family in Lumo colours, and never move it!". The Small Sprocket is not just a light tackle lure and will hold it's own trolled in the Shotgun position in a heavy tackle spread, especially in the Angel colours.
