

Tagpole - 12 foot telescopic Flexhead. includes 3 applicators

Tagpole 12 foot telescopic

includes Billfish, Tuna & Shark Tag Adaptor

Here's a genuine innovation that's going to have game fishos saying, "Why didn't someone think of this before?" The Black Pete Three-In-One Tag Pole comes with three interchangeable heads, meaning you now don't need to carry three separate tag poles for marlin, tuna and shark tags. The different heads are securely stored inside the threaded butt cap, and it's only a second's work to swap them over. The tag applicators also have a rubber collar around the base, which provides a little bit of shock absorption for when the tag hits home, and this should make bent or broken tag applicators a thing of the past.

The Three-In-One design is available in Black Pete's new six, nine and 12 foot telescopic tag poles, the small hand tag pole, the six foot two piece, nine foot two piece and 12 foot three piece poles. The poles are heavy duty black anodised with EVA grips and 316 marine grade stainless needles and fittings.

Purchase is for a 12 foot pole with 3 applicators.

Only available to customers in Australia
